

RCTrms

Industrially specified true rms ac current transducer

RCTrms - Thin, flexible, clip-around, ac current transducer with true rms output

The RCTrms is an ac current transducer for permanent installation. Simple to install and easy to retrofit it combines the benefits of a thin, flexible, clip-around Rogowski (sense) coil with a signal conditioner providing accurate, true rms measurement, of ac current.

The RCTrms has an industry standard 4-20mA output making it ideal for process control, status alarming or system monitoring purposes. Typically the RCTrms is used with SCADA systems, PLCs, data loggers and protection equipment.

The RCTrms is an ac current transducer providing a 4 to 20mA output proportional to the true rms of the primary current and has the advantages:

- Easy to retrofit
- Simple to install in applications where space is limited
- The size of the Rogowski coil can be specified independently of the primary current
- Does not suffer from magnetic saturation
- Intrinsically safe
- Ideal for process control, status alarming or system monitoring in a wide variety of applications, from arc furnaces to power distribution.

Order code RCTrms

The RCTrms order code can be generated as follows:

Rated current (A)	Cable Length (m)	Coil Length (mm)	Options
250A	1m	300mm	BC-BNC Split in Cable
500A	2.5m	500mm
